8

Rate Limit (requests/min)

5

Available Tools

get\_medical\_info(condition (str))

Fetches reliable medical information about a condition or symptom from Wikipedia.

get\_drug\_info(drug\_name (str))

Returns basic information about common medications from an internal database.

calculate\_bmi(weight\_kg (float), height\_cm (float))

Calculates Body Mass Index (BMI) and interprets the result.

medical\_disclaimer(no args)

Returns the standard medical disclaimer. Always invoked in final responses.

AI AGENT SYSTEM

Medical Information Assistant

ReAct Agent · Tool Dispatcher · Guardrails · Rate Limiting

System Architecture

Data Flow

1. User submits a health query

2. ReAct agent reasons step-by-step

3. Tool Dispatcher routes to correct tool

4. Observations feed back to the agent

5. Output Filter scans the final answer

6. Rate Limiter enforces per-minute budget

Guardrails Active

Output Filter — redacts dosage instructions, diagnosis claims, and directive advice

Rate Limiter — sliding-window cap on requests/minute

Iteration Cap — hard limit on LLM tool calls per request

Mandatory Disclaimer — always appended to final answers

Ask the Medical Assistant

Try an example query

— select an example —

e.g. I have a headache and sore throat — what could it be?

ACTION

get\_medical\_info condition=headaches

OBSERVATION

Information about 'headaches':  
A headache, also known as cephalalgia, is the symptom of pain in the face, head, or neck. It can occur as a migraine, tension-type headache, or cluster headache.[1][2] There is an increased risk of depression in those with severe headaches.[3]  
  
Headaches can occur as a result of many conditions. There are a number of different classification systems for headaches. The most well-recognized is that of the International Headache Society, which classifies it into more than 150 types of primary and secondary headaches. Causes of headaches may include dehydration; fat...

ACTION

get\_medical\_info condition=fever

OBSERVATION

Information about 'fever':  
Fever or pyrexia in humans is a symptom of an anti-infection defense mechanism that appears with body temperature exceeding the normal range caused by an increase in the body's temperature set point in the hypothalamus.[5][6][7][12] There is no single agreed-upon upper limit for normal temperature: sources use values ranging between 37.2 and 38.3 °C (99.0 and 100.9 °F) in humans.[1][7][8]  
  
The increase in set-point triggers increased muscle contractions and causes a feeling of cold or chills.[2] This results in greater heat production and efforts to conserve heat.[3...

Final Answer

Final Answer

Frequent headaches and mild fever can be caused by a variety of conditions, including:

1. **Viral Infections:** Common colds or flu can lead to headaches and fever.

2. **Sinusitis:** Inflammation of the sinuses can cause headaches and fever.

3. **Migraine:** Migraines can be accompanied by fever in some cases.

4. **Tension Headaches:** Stress and tension can lead to headaches, sometimes accompanied by mild fever.

5. **Dehydration:** Not drinking enough fluids can lead to headaches and fever.

6. **Infections:** Other infections, such as meningitis or other systemic infections, can present with these symptoms.

It's important to consult a healthcare professional for an accurate diagnosis and appropriate treatment.
